

06Oct2010

From: Mr. David Natale

To: Concord West Residents Ad Hoc Committee

Hello Dr. Correa et al,

Please accept this document as a record of my commitment to assist your organization in achieving its goal in protecting the greenland in your neighbourhood which is currently being considered for Metrolinx and GO station development.

I must state I was extremely impressed by your presentation as it not only identified problematic issues with current planning models but your organization provided very viable alternative solutions. If elected mayor, you will have a champion on council who will support your initiative and counter proposals; specifically, the relocation of any stations/terminals to the north side of Hwy #7 and/or Centre St. As for putting a freeze on the sale of Parcel B(Concord Floral Land), that too is a good idea and will have my support.

I will put forth a council motion supporting the recommendation of transfer of said lands from the ORC to the TRCA immediately. The access tunnel will be re-addressed and receive utmost priority for planning, funding and construction. At the very least the residents of Concord West should have access to the greenland while all other facets of development continue to go through due diligence and review.

Eighteen years of waiting with no significant progress is not only wasteful but shameful of a municipal government and council.

Regards,
